What is the difference between differential equations and

Moreover, differential equations are generally used in analog circuits and conversely, difference equations are used in digital circuits (systems that take measurements with digital I/O boards or GPIB instruments). Z transform is used to solve difference equations while Laplace transform is used for differential equations.

Mathematical methods for economic theory 9 1 First order

A solution of the first-order difference equation x t = f(t, x t 1) is a function x of a single variable whose domain is the set of integers such that x t = f(t, x t 1) for every integer t, where x t denotes the value of x at t.
